Bisphenol A (BPA) and Pall F&B Filter Cartridge Products

In response to wide spread concerns over the presence of bisphenol A (BPA) in foodstuffs, a number of countries have introduced legislative measures to reduce or eliminate sources of BPA in food contact materials.

For example, the French National Assembly has introduced a series of extensive control measures - it is our understanding that these bisphenol A (BPA) requirements relate directly to containers, utensils and packaging in contact with food, and not large industrial installations such as Pall filtration equipment.

In the USA the 'The BPA in Food Packaging Right to Know Act' aims to have all food packaging containing BPA to be labelled with 'This food packaging contains BPA, an endocrine-disrupting chemical, according to the National Institutes of Health'. Again this action currently appears to relate to packaging on contact with food, and not large industrial installations such as Pall filtration equipment.

However, it is understandable that customers, as part of an overall risk reduction plan, wish to identify any sources of BPA being used in contact with their products. Note that Pall Corporation also does this with our suppliers via an internal quality specification E-962 (<http://www.pall.com/main/about-pall/quality-at-pall/supplier-information.page>).

The following cartridge filters meeting the requirements of the food contact compliance program and the specifications set out in E-962 are not constructed with polymeric materials based on bisphenol A.

The table below details the type of cartridge filter, the product family, an example part number structure and location of the declaration of compliance.

Product Family	Example Part Number Structure	Declaration of Compliance
Air/Gas Service Membrane Filter Cartridges		
Emflon® PFAW Filter Cartridges	AB_PFA_W_	http://www.pall.com/pdfs/Food-and-Beverage/Emflon_PFAW_Filter_Cartridges_AB_Style_DECLARATION_OF_COMPLIANCE.pdf
