The Supor Beverage filter cartridges each use a single layer of Supor polyethersulfone (PES) 0.45 µm filter membrane in a polypropylene filter construction.

Supor Beverage filters are suitable for microbial removal from aqueous-based, slightly alcoholic food and beverage products, such as wine.

An initial flush is recommended prior use.

Issued 1 May 2014
Revised 1 February 2019
Expires 28 February 2021

Supor Beverage Filter Cartridges (AB Style “W” Code)

Components

Filter Membrane  One layer of hydrophilic Supor polyethersulfone membrane
Support / Drainage  Polypropylene
Cage  Polypropylene with titanium dioxide filler
Core, End Cap and Fin End  Polypropylene
Adaptor  Polypropylene with a stainless steel reinforcing ring as appropriate to design
O-ring Seal  Silicone Elastomer (H4) or Ethylene Propylene Rubber (J)

Declaration

Supor Beverage “W” Code filter cartridges comprise of materials that meet regulatory and legislative requirements and guidelines for food contact in that:

Europe

The “W” Code Supor Beverage filter cartridges meet the requirements for food contact as detailed in European Regulation (EC) Number 1935/2004 in that:

Our suppliers’ information indicates that the polymeric materials used to produce “W” Code Supor Beverage filter cartridges are made from monomers and additives consistent with Annex I of European Regulation (EU) number 10/2011 and its amendments relating to plastic materials and articles intended to come in contact with foodstuffs (excluding seals).

Migration testing of cartridges employing the same materials of construction as the ‘W’ code Supor Beverage filter, has been performed, and met migration criteria after flushing and in flow conditions.

OML tested as AB1SBB7WH4 in:
- Simulant A (10% ethanol) for 2 hours at reflux,
- Simulant B (3% acetic acid) for 2 hours at reflux,
- Simulant C (20% ethanol) for 2 hours at reflux.
- Simulant D1 (ethanol 50%) for 2 days at 60 ºC.

Our supplier states that the Silicone elastomeric seal material used conforms to BfR recommendation XV.
Our supplier states that the EPR elastomeric seal material used conforms to BfR recommendation XXI.

Note: This product contains materials that are subject to Specific Migration Limit (SML) requirements.

Users should satisfy themselves that these materials are suitable for use in their specific food application.

USA

The raw materials of construction meet the FDA requirements for food contact use as detailed in Code of Federal Regulations, 21 CFR paragraphs 170-199 in that:

- Polypropylene to 21 CFR section 177.1520 (Olefin polymers)
- Polyethersulfone resin to 21 CFR section 177.2440 (Polyethersulfone resins)
- Ethylene Propylene Rubber and Silicone Elastomeric seal materials to 21 CFR section 177.2600 (Rubber articles intended for repeated use, excluding milk and edible oils)

In addition, the Supor SBB filter employs a copolymer of polyethylene glycol dimethacrylate, trimethylol methacrylate and 2-hydroxyethyl methacrylate. Filters employing this chemistry in a membrane cartridge for the filtration of beer and wine, have been granted Food Contact Substance Notification FCN 001397, for use as repeat microbial filter intended to clarify beer and wine.
Process Quality System

Site of Manufacture: Pall Filtersystems GmbH, Bad Kreuznach, Germany on behalf of Pall International Sàrl.

The Quality Management System at Pall Filtersystems GmbH, Bad Kreuznach, is certified to ISO 9001:2015.

These products / product packaging carry a lot number / date code to facilitate traceability to suppliers’ materials and Pall production records.

Pall Filtersystems GmbH confirm that this product is manufactured in line with the principles of food contact materials GMP as detailed in Regulation 2023/2006.
